Lecture _____
Lab ________
OJT ________

**D. Catalog Description**

An intensive review course on accrual accounting with emphasis on work sheets, adjusting and closing entries, and financial statements. This course leads into an in-depth study of cash and investments, receivables, inventory and fixed assets. It emphasizes the application of generally accepted accounting principles to short- and long-term liabilities, corporate equities, special problems in income reporting and determination, and changes in financial position. Prerequisite: AC 225.

**E. Target Population**

This advanced accounting course is required for students in selected business and public administration programs.

**F. Certificate, Degree, or Other Requirements Met by Course**

Intermediate Accounting is a required course for students enrolled in selected Associate of Arts (AA) Degree and certificated programs in business and public administration.

**G. Employment Entry or Upgrading If Any**

Students satisfactorily completing this course are competent to enter selected business and public administration fields at a decision-making level.
