1. **Department**
   Languages and Humanities

2. **Purpose**
   Students must be able to organize and present ideas effectively in formal writing. This course focuses on several of the most common strategies for developing ideas in writing and on the conventions and grammatical patterns associated with each of them. EN 101 and EN 202 equate to the full year of freshman English composition required by all colleges and universities.

3. **Description**
   **A. Required/Recommended Textbook(s) and Related Materials:**
   **Required:**
   Readability level: Grade 7.8
   
   **Recommended:**
   College-level Dictionary

   **B. Contact Hours**
   1. **Lecture:** 3 per week/45 per semester
   2. **Lab:**
   3. **Other:** Private conferences

   **C. Credits**
   1. **Number:** 3
   2. **Type:** Regular degree credits

   **B. Catalogue Course Description:** This course introduces students to the characteristics of formal written discourse and to rhetorical conventions associated with exposition. The objective is to help develop the ability to express ideas in short, formal compositions (300 to 500 words) which are unified, coherent, and concise. This course also provides practice in the skills needed to write academic research papers. It covers methods of generating, supporting, and organizing ideas; of analyzing primary and secondary sources of evidence; and of presenting arguments in convincing, logical prose in a five- to seven-page research paper, with sources properly cited. (English Placement Level: EN 101)
F. Course Activities and Design:

1. After a period of general discussion, demonstration, and modeling of key elements associated with a particular organizational approach, students are assigned a formal composition which allows them the opportunity to use what they have learned and to practice that approach. Students are encouraged to rewrite their compositions if, in the instructor's judgment, the writing needs correction, more precise word choice, or expanded development. It is sometimes helpful for classes to examine excerpts from their own essay assignments, especially when the selections serve to highlight common difficulties with or offer outstanding examples of unity, coherence, conciseness, or unusual vividness.

2. Students are introduced to academic research writing. They are instructed in the methods of conducting research using all available secondary sources; in the formats and techniques of citing and recording research sources; in the skills of summarizing and paraphrasing; and in the similarities and differences between non-research and research expository writing.

4. Course Prerequisite(s); Concurrent Course Enrollment;
   Required English/Mathematics Placement Level(s)

5. Estimated Cost of Course; Instructional Resources Needed:
   To the student: Tuition and fees for a three-credit course; textbook
   To the college: Salary of instructor for 4 credits, which includes three (3) course credits as well as one (1) additional credit for teaching a writing course.

   Instructional resources needed for this course include chalk and chalkboard, overhead projector; television and VCR, computer and projector.
6. **Method of Evaluation:** Grades will be based partly on student performance in class, on resubmission of corrected essays, and on regular exercises. However, the quality and improvement of student writing as exhibited in regular short composition assignments, as well as adherence to standard academic techniques in a final research paper assignment, will be the major factors in determining final grades. NMC's grading and attendance policies will be followed.

A: Excellent—grade points: 4.0
B: Above average—grade points: 3.0
C: Average—grade points: 2.0
D: Below average—grade points: 1.0
F: Failure—grade points: 0.0
