

Northern Marianas College

CURRICULUM ACTION REQUEST

Course: BI252 Human Anatomy and Physiology II

Effective Semester / Session: Fall 2023

Type of Action:

- New
- Modification
- Move to Inactive (Stop Out)
- Cancellation

Course Alpha and Number: BI252

Course Title: Human Anatomy and Physiology II

Reason for initiating, revising, or canceling:

This course has been modified for periodic updates. Substantive changes were made to the SLOs, credit load, and textbook.

Course Guide

Page: 2

Course: BI252 Human Anatomy and Physiology II

1. Department

Science, Math, Health, and Athletics

2. Purpose

This course will provide students in nursing and health care programs or any other interested students with knowledge of human anatomy and physiology. Human Anatomy and Physiology II is the second course of a two-course sequence of studies.

3. Description

A. Required/Recommended Textbook(s) and Related Materials

Required:

Rizzo, D. C. (2016). Fundamentals of Anatomy and Physiology (4th ed).

Cengage Unlimited: [http:// www.cengage.com](http://www.cengage.com)

Recommended:

VanPutte, C., Regan, J., Russo, A., & Seeley, R. (2017). Seeley's Anatomy & Physiology (11th ed.). New York: McGraw-Hill Companies, Inc.

B. Contact Hours

1. **Lecture:** 3 per week / 45 per semester
2. **Lab:** 3 hours per week / 45 hours per semester
3. **Other:** None

C. Credits

1. **Number:** 4
2. **Type:** Regular Degree Credits

D. Catalogue Course Description

This is the second part of a two-semester sequence covering human anatomy and physiology at the biochemical, cellular, microscopic, tissue, and organ levels. This course is designed for those entering professional health care fields, although enrollment is open to all students. Laboratory and field trips are required. Prerequisite: BI251. English Placement Level: EN202. Math Placement Level: MA132. (Offered Fall and Spring)

E. Degree or Certificate Requirements Met by Course

This is a required course for Liberal Arts emphasis in Health and PE, an elective course requirement, and a requirement for the Nursing Degree Program.

Course: BI252 Human Anatomy and Physiology II

F. Course Activities and Design

This course includes lectures, discussions, group work, laboratory activities, homework and web-based assignments, video and slide presentations, quizzes, tests, field trips, research projects, and oral presentations.

4. Course Prerequisite(s); Concurrent Course Enrollment

Prerequisites: BI251 with a "C" or better for Nursing program and LA with emphasis on Health and PE

Concurrent Course Enrollment: None

Required English/Mathematics Proficiency Level(s)

English Placement Level: EN202

Mathematics Placement Level: MA132

5. Estimated Cost of Course; Instructional Resources Needed

Cost to the Student: Tuition for a 4-credit hour course, laboratory fee, cost of the textbook and lab manual.

Cost to the College: Instructor's salary; science lab/classroom

Instructional resources needed for this course include: replacement of expendable laboratory materials, whiteboard and markers, computer, internet connection, anatomical models, and reference materials.

6. Method of Evaluation

Student grades will be based on assignments, quizzes, tests, projects, presentations, laboratory activities, and reports. NMC's grading and attendance policies will be followed.

Course: BI252 Human Anatomy and Physiology II

7. Course Outline

This is a topical outline and does not necessarily indicate the sequence in which the material will be presented.

- 1.0 The Cardiovascular System
 - 1.1 Anatomy and functions of the heart and vessels
 - 1.2. Composition and functions of blood
 - 1.3 Route of blood and lymph
 - 1.4 Hemostasis
 - 1.5 Regulation of heartbeat
 - 1.6 Components and functions of the lymphatic system

- 2.0 The Respiratory System
 - 2.1 Anatomy and physiology of the respiratory system
 - 2.2 Measurement of lung function
 - 2.3 Physical principles of gas exchange
 - 2.4 Regulation of ventilation

- 3.0 The Digestive System
 - 3.1 Anatomy and physiology of the digestive system
 - 3.2 Enzymes of digestion and other chemical substances

- 4.0 Nutrition, Metabolism, and Temperature Regulation
 - 4.1 Nutrition
 - 4.2 Metabolism of organic compounds
 - 4.3 Metabolic rate
 - 4.4 Body temperature and regulation

- 5.0 The Urinary System
 - 5.1 Anatomy and physiology of the urinary system
 - 5.2 Regulation of urine concentration and volume
 - 5.3 Plasma clearance and tubular maximum

- 6.0 Water, Electrolyte, and Acid-Base Balance
 - 6.1 Fluid balance and homeostasis
 - 6.2 Electrolytes
 - 6.3 Regulation of acid-base balance

- 7.0 The Reproductive System
 - 7.1 Anatomy and physiology of the male and female reproductive system
 - 7.2 Female reproductive and menstrual cycle

Northern Marianas College

Course Guide

Page: 5

Course: BI252 Human Anatomy and Physiology II

- 8.0 Development, Growth, and Aging
 - 8.1 Prenatal development
 - 8.2 Parturition
 - 8.3 The newborn
 - 8.4 First year after birth
 - 8.5 Aging and death

Course: BI252 Human Anatomy and Physiology II

8. Instructional Goals

The course will introduce students to:

- 1.0 The structures and functions of the cardiovascular system, lymphatic system, respiratory system, digestive system, urinary system, and reproductive system;
- 2.0 Innate and adaptive immunity;
- 3.0 Basic nutritional concepts and metabolism;
- 4.0 Homeostatic role of buffers in the body's acid-base balance;
- 5.0 Changes in the human body associated with puberty;
- 6.0 The female reproductive cycle: menstruation, menopause, and aging;
- 7.0 Embryonic and fetal development, parturition and changes at birth and first year after birth, aging and death; and
- 8.0 Uses of anatomy and physiology knowledge in real-world situations.

Course: BI252 Human Anatomy and Physiology II

9. Student Learning Outcomes

Upon successful completion of this course, students will be able to:

- 1.0 Identify the structures of the cardiovascular system, lymphatic system, respiratory system, digestive system, urinary system, and reproductive system;
- 2.0 Describe the functions of the cardiovascular system, lymphatic system, respiratory system, digestive system, urinary system, and reproductive system;
- 3.0 Explain how certain organ systems work together to maintain homeostasis;
- 4.0 Describe modern technology and diagnostic tools used to study organs and functions of the body; and
- 5.0 Apply anatomical and physiological concepts/knowledge to real-world situations.

10. Assessment Measures of Student Learning Outcomes

Assessment of student learning may include, but not be limited to, the following:

- 1.0 Assignments;
- 2.0 Quizzes and Tests;
- 3.0 Laboratory Activities and Reports;
- 4.0 Projects and Presentations; and
- 5.0 Cumulative Final Exam.
