Course : AR 214 Painting

1. Department: Social Sciences and Humanities

2. Purpose:

AR 214 is a specialized course for those individuals interested in developing painting skills for personal enhancement, and for those students who need to establish a portfolio of work for transferring to an art program at another school.

The arts convey knowledge and meaning not learned through the study of other subjects. They represent a form of thinking and a way of knowing that is based in human imagination and judgment. The arts provide pleasure, but they are also intellectual disciplines of substance. Like language or mathematics, the arts involve the use of complex symbols to communicate. The study of art engages students in learning activities which require use of higher-order thinking skills like analysis, synthesis, and evaluation. AR 214 will help students develop these abilities, enrich their knowledge and experience, and broaden their perspective on the world around them.

The primary target population for this course consists of students pursuing the A.A. in Liberal Arts, as it fulfills the General Education fine arts requirement for the General, Elementary Education, and Special Education degree emphases. It is also a suggested elective for the A.A.S. in Business Administration.

AR 214 has been articulated with a similar course by agreement with the University of Guam.

6. Method of Evaluation:

Student learning is evaluated on the basis of a portfolio of paintings which demonstrate the understanding of concepts, individual progress in skill development, imagination and creativity, craftsmanship, and neatness of presentation. Also considered in the evaluation process are the completion of preparatory sketches and research assignments, and class participation in group critiques. All work must be satisfactorily completed in order to receive a grade. NMC's letter grading and attendance policies will be followed.
